

The 'slow' indoor and outdoor hay feeder

Pacefeeder is a specially designed hay feed box with a self-adjusting grid to allow a horse to search, pull, chew and eat a limited amount of hay in a naturally continuous and slow manner in their correct body posture. This means ensuring the horse is getting the right amount of hay over a longer period of time, mimicking a horse's natural grazing behaviour.

Pacefeeder's slow hay feeding method makes for a happier, healthier and more relaxed horse.

The Pacefeeder indoor and outdoor hay feeder has been created specially as a slow hay feeder. The Pacefeeder is durable, water and rot proof, easy to clean, fit and long lasting. The Pacefeeder is designed and manufactured in Ireland and is available in different shapes and sizes to suit you and your equine's needs.

Height 660mm (26")
Width 930mm (37")
Depth 660mm (26")
Holds approx. 5kg of Hay

Standard Corner Model

Height 780mm (30")
Width 930mm (37")
Depth 660mm (26")
Holds approx. 7kg of Hay

Benefits of using the Pacefeeder for horses

- ◆ Works with the horses natural digestive system and behaviours.
- ◆ Horses are less likely to suffer from 'ulcers' & other gastric disorders.
- ◆ Perfect for horses with issues like laminitis, inhalant allergies, bronchial & joint problems and weight issues.
- ◆ Natural position of head and body when used leading to less physical problems.
- ◆ No ingestion of dirt, sand or parasites from the ground.
- ◆ Helps reduce anxiety & stress levels in your horse.
- ◆ Helps reduce bad stall habits and behaviour.

Benefits of using the Pacefeeder for owners

- ◆ Contributes towards reducing vet bills.
- ◆ Reduces feed costs.
- ◆ Reduces waste from trampling and soiling of hay.
- ◆ Saves you hours of labour and effort on filling, feeding times and clean-up.
- ◆ Horses are always ready to ride or work.
- ◆ Gives you a more flexible schedule.
